#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

**Species I:** Figures 1 through 6; the first heat roller 11, second main heat roller 21, and second auxiliary heat roller 20 constitute heating means for heating the secondary image transfer nip, and the toners are heated to above the melting point or softening point.

**Species II:** Figures 7 through 10; the image forming apparatus also includes a scanner.

**Species III:** Figure 11; a first peeler adjoins the outlet of the secondary image transfer nip, and a second peeler adjoins the sheet path.

**Species IV:** Figure 12; the apparatus additionally includes an auxiliary roller 23 over which the second belt 16 is passed between the second auxiliary heat roller 20 and the peel roller 19, also additionally includes a nip extend roller 57.

**Species V:** Figures 13 and 14; it includes a layer structure of each of the first and second belts, and the circumferential lengths of the belt 8 and that of the belt 16 up to positions where they are cooled by the cooling means 14 and 17, respectively, are the same as each other.

**Species VI:** Figures 15 through 17; the apparatus includes a mark sensor and a control mechanism for controlling the exposure timing.

**Species VII:** Figures 18 and 19; the apparatus includes a temperature sensor and a control mechanism for controlling the exposure timing.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic for claims 1 through 36, and claim 37 is generic for claims 37 through 55.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
